

OUR ART

Values led

- As part of our teaching of Art, the children explore a variety of artists and build an appreciation for diversity; honouring other people's culture. We believe exposing our children to Art promotes integration amongst communities.

Inclusive

- All children irrespective of ability, are exposed to high-quality art lessons which strive to embed the skills of design, paint, craft and design and sculpture using a range of media. The children are taught to evaluate and analyse each other's work building respect for one another.

Systematic

- The Art curriculum, adapted from the Kapow scheme and is carefully planned and sequenced. We provide regular opportunities to revisit learning, building on previous knowledge and developing skills and vocabulary in a range of topics and contexts.

Aspirational

- Art is used to develop a deeper awareness of skills, imagination and creative flair. We provide students with an experience that is engaging and inspiring. In doing so we stimulate creativity and imagination while being open to multiple interpretations and opinions.
